**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 05 April 2005.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 112***

Claim 9 is and are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9 line 3 "the annular channel is formed by radial tapering at the valve piston" is confusing. A taper is a shape having a non-perpendicular and non-parallel (i.e. inclined) surface. The annular channel does not have a taper, and nowhere in the rest of the specification is a taper mentioned.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. § 102(b) as being anticipated by Dantlgraber. Dantlgraber discloses a volumetric flow control apparatus for a hydraulic pump (1), which delivers fluid into a working line (1a) and has an adjusting device (9, 10) for adjusting a displacement of the pump, based on an actuating pressure controlled by a control valve (18); the control valve has first and second pressures loading opposed first and second measuring surfaces (4a, 4b, respectively), respectively, by respective first and second lines (20, 23, respectively); wherein the first pressure is higher than the second pressure; and an annular pressure chamber (18a) is formed between the first and second measuring surfaces, with a leakage flow path between the pressure chamber and the second measuring surface and a counter pressure line (4c, 4d) connected between the pressure chamber and the first line; wherein the first and second lines are connected to the working line and downstream of a throttle (2) in the working line, respectively. A sealing portion (between 4b and 18a) of the valve piston (4) has no seal and must allow the valve to move back and forth, and therefore must have some leakage between it and the surrounding wall.

Art Unit: 3745

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dan Lopez whose telephone number is 571-272-4821. The examiner can normally be reached on Monday-Thursday from 6:00 AM -4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ed Look, can be reached on 571-272-4820. The fax number for this group is 571-273-8300. Any inquiry of a general nature should be directed to the Help Desk, whose telephone number is 1-800-PTO-9199.
